Experience

IT Data Management Intern | *Staff Domain – Internship* **January 2026 – June 2026**

- Orchestrated the migration and schema restructuring of 20,000+ hardware and software asset records from unstandardized legacy spreadsheets into a normalized Snipe-IT relational database.
- Implemented rigorous automated validation and cleansing routines via PowerShell and CLI scripts, maintaining full relational integrity and eliminating duplicate asset records by 100%.
- Accelerated IT provisioning latency by 80% by standardizing operational database schemas, audit fields, and asset tracking models.
- Designed audit queries in SQL to monitor operational reporting anomalies, identify missing entity metadata, and streamline enterprise lifecycle tracking.

Projects

Social Media Analytics Automated ETL Pipeline | *Python, PostgreSQL, Pandas, Docker, cron* **August 2026**

- Architected an automated end-to-end data pipeline extracting multi-platform performance metrics, executing data validation, schema normalization, and transformation workflows using Python and Pandas.
- Automated scheduled batch ingestion workflows into PostgreSQL using containerized Docker deployments, logging pipeline health metrics while ensuring strict ACID compliance across 10,000+ records.
- Optimized database storage configurations and indexing strategies to handle time-series analytics, reducing batch write latency and accelerating downstream aggregation queries.

Web-Based Ticketing & Queue Analytics System | *Python, Flask, PostgreSQL, SQL, JavaScript* **June 2026**

- Designed a relational database schema supporting role-based access control and high-frequency ticket logging with strict foreign key constraints and transactional integrity.
- Engineered real-time analytical dashboards tracking throughput, queue bottlenecks, and agent resolution metrics, serving analytical queries in under 150ms.
- Implemented automated aggregation queries cutting operational triage latency by 40%, surfacing actionable bottleneck metrics to departmental supervisors.

Four-in-One Vital Sign Telemetry & Anomaly Pipeline | *Python, MySQL, XGBoost, PyTest* **June 2025 – May 2026**

- Engineered a scalable telemetry ingestion pipeline using Flask and MySQL to capture, validate, and structure time-series sensor feeds from 5 biomedical streams with sub-second latency.
- Built and evaluated predictive risk assessment models using XGBoost and statistical testing (paired t-tests) to classify physiological metrics and identify abnormal vital sign variations.
- Validated data flow reliability, API schema contracts, and boundary conditions under ISO/IEC 25010 standards using automated PyTest suites.

Certifications

Associate Data Engineer | *DataCamp (ID: DEA0017096233010)* **August 2026**

- Timed competency credential validating production-level data pipeline orchestration, database management, and query optimization.

Associate Data Analyst | *DataCamp* **August 2026**

- Assessment-based certification covering advanced PostgreSQL querying, complex aggregations, window functions, and analytics transformation.

Data Fundamentals | *IBM SkillsBuild & TESDA* **July 2026**

- Enterprise credential covering cloud data architecture, relational systems, cleansing lifecycles, and predictive analytics pipelines.

Python Essentials 1 | *Cisco Networking Academy & OpenEDG* **July 2026**

- Validated programming proficiency in OOP principles, modular package design, algorithm development, and exception handling.

Technical Skills

Languages: Python, SQL (PostgreSQL, MySQL), Bash, PowerShell
Data Engineering & ETL: ETL/ELT Pipelines, Batch Processing, Data Cleansing, Schema Design (3NF, Star Schema), Data Migration, ACID Transactions
Data Analytics & BI: Pandas, NumPy, XGBoost, Statistical Hypothesis Testing (Paired t-test), Power BI, Tableau, Advanced Excel
Databases & Cloud Tools: PostgreSQL, MySQL, Snowflake, Docker, DBeaver, Supabase, Git/GitHub, Linux

Education

Bachelor of Science in Computer Engineering | *Rizal Technological University* **Graduated – July 2026**

- Cumulative General Weighted Average (CGWA): 1.73 | Dean's List Academic Honor Awardee
- Specialization in Data Architecture, Applied Machine Learning, and Embedded IoT Systems
