

# Khin Andrei Gamboa

Pasig City, Philippines | +63 992 421 5130 | [gamboa.khinandrei@gmail.com](mailto:gamboa.khinandrei@gmail.com)  
[khinandrei.com](http://khinandrei.com) | [github/khinandrei](https://github.com/khinandrei) | [linkedin/khinandreigamboa](https://linkedin.com/in/khinandreigamboa)

## Experience

- IT Developer Intern** | *Staff Domain – Internship* January 2026 – June 2026
- Programmed modular automation tooling and CLI scripts in PowerShell to automate workstation configurations, environment setup, and routine systems diagnostics.
  - Developed automated ETL data migration scripts mapping 20,000+ unstandardized asset records into relational database structures with zero downtime.
  - Contributed to internal ITMS modules by debugging backend issues, writing regression scripts, and tracking bug lifecycles in Jira.
  - Built and deployed custom scripting solutions to interface with Active Directory and Azure AD APIs, automating credential and endpoint provisioning workflows.

## Projects

- Web-Based Ticketing & Queue Analytics System** | *Python, Flask, SQL, JavaScript, React.js, Vercel* June 2026
- Architected a full-stack support ticketing engine featuring relational SQL storage, role-based access control (RBAC), and automated issue routing pipelines.
  - Engineered RESTful APIs in Flask serving real-time analytics payloads under 150ms, decreasing support triage latency by 40%.
  - Built dynamic, responsive UI views for queue management and implemented robust parameter validation to prevent query bottlenecks.
- Four-in-One Vital Sign Kiosk System** | *Python, Flask, MySQL, React.js, Docker, PyTest* June 2025 – May 2026
- Architected a 3-tier backend service in Flask and designed relational MySQL schemas to ingest, index, and query health telemetry from 5 serial sensor streams with sub-second latency.
  - Engineered and deployed machine learning anomaly detection pipelines, integrating trained inference models directly into backend API endpoints.
  - Developed responsive frontend interfaces in React.js, implementing intuitive UI/UX workflows to visualize real-time diagnostics received from RESTful endpoints.
- Social Media Analytics Automated Pipeline** | *Python, PostgreSQL, Pandas, Docker, cron* August 2026
- Engineered modular Python services to ingest and normalize external API payloads, ensuring error-handling resilience across 10,000+ transaction batches.
  - Containerized microservices using Docker and automated scheduled execution with cron, maintaining transactional database consistency.
- AI Kilo Bot Embedded App** | *Python, Raspberry Pi, Roboflow, Sensor Fusion* December 2025
- Developed multi-threaded software integrating live camera feeds with strain-gauge telemetry to calculate automated checkout transactions.
  - Optimized inference pipeline logic down to 65ms per cycle on edge hardware, ensuring responsive user-facing UI interactions.

## Certifications

- Python Essentials 1** | *Cisco Networking Academy & OpenEDG* July 2026
- Validated programming proficiency in OOP principles, modular package design, algorithm development, and exception handling.
- Associate Data Engineer** | *DataCamp (ID: DEA0017096233010)* August 2026
- Timed competency credential validating database management, query optimization, and production pipeline execution.
- Data Fundamentals** | *IBM SkillsBuild & TESDA* July 2026
- Validated understanding of relational systems, software architectures, and database design.

## Technical Skills

**Programming Languages:** Python, JavaScript, TypeScript, C#, C++, SQL, Bash, PowerShell, HTML/CSS  
**Full-Stack & Backend Frameworks:** Flask, React.js, Node.js, RESTful APIs, JSON, Tailwind CSS  
**Databases & ORM:** PostgreSQL, MySQL, Supabase, Relational Modeling, Query Optimization  
**DevOps, Tooling & Environments:** Git/GitHub, Docker, Linux, Vercel, Postman, PyTest, CI/CD Pipelines

## Education

- Bachelor of Science in Computer Engineering** | *Rizal Technological University* Graduated – July 2026
- Cumulative General Weighted Average (CGWA): 1.73 | Dean's List Academic Honor Awardee
  - Specialization in Software Systems, Applied Machine Learning, and Data Architecture
