Experience

IT Administrator and Operation | *Staff Domain – Internship* January 2026 – June 2026

- Spearheaded data migration of 20,000+ hardware and software assets from unstandardized legacy spreadsheets into a centralized Snipe-IT relational database, reducing onboarding provisioning latency by 80%.
- Streamlined end-to-end workstation onboarding by provisioning, installing operating systems, and deploying enterprise tools to guarantee day-one readiness for new personnel.
- Joined workstations to domain environments, configuring access permissions and identity policies across Active Directory and Azure AD.
- Engineered modular automation scripts in PowerShell and CLI to accelerate system setup, routine maintenance, and remote workstation diagnostics.
- Diagnosed and resolved Tier-1 and Tier-2 hardware, software, and connectivity disruptions, maintaining a high first-contact resolution rate.
- Performed network configuration, IP parameter settings, and diagnostic checks (ping tests, DNS/DHCP validation) to maintain reliable subnet connectivity.
- Configured and supported enterprise VPN connections to maintain secure remote access for distributed hybrid employees.
- Executed functional QA testing and bug tracking in Jira for IT Management System (ITMS) modules, partnering with DevOps to validate release fixes.

Projects

Web-Based Ticketing & Queue Analytics System | *Python, Flask, SQL, JavaScript, Vercel* June 2026

- Architected a full-stack support ticketing engine featuring relational SQL storage, role-based access control, and automated issue routing pipelines to accelerate cross-department ticket resolution.
- Engineered real-time queue analytics dashboards to monitor operational bottleneck metrics, cutting support triage latency by 40% and serving automated backend analytical queries under 150ms.

Enterprise Telemetry Kiosk & Secure Networking | *Tailscale Mesh VPN, Linux, Python* June 2025 – May 2026

- Architected and secured remote deployment telemetry communication across distributed endpoints utilizing Tailscale mesh VPN and encrypted protocols.
- Maintained continuous uptime and reliable edge connectivity across remote embedded hardware terminals running custom Linux distributions.

Containerized Batch Analytics Infrastructure | *Docker, cron, Linux, PostgreSQL* August 2026

- Deployed containerized services using Docker and automated scheduled recurring tasks via cron under a standardized Linux server environment.
- Configured automated health monitoring and system logging to guarantee transactional continuity across 10,000+ data processing records.

Certifications

Python Essentials 1 | *Cisco Networking Academy & OpenEDG* July 2026

- Validated programming proficiency in scripting, automation routines, and error handling.

Data Fundamentals | *IBM SkillsBuild & TESDA* July 2026

- Enterprise credential covering cloud database infrastructure, data administration, and enterprise information systems.

Associate Data Engineer | *DataCamp (ID: DEA0017096233010)* August 2026

- Validated competency in database management, relational storage systems, and query efficiency.

Technical Skills

Systems & Directory Services: Active Directory, Azure AD / Entra ID, Snipe-IT Asset Management, Windows Server, Linux (Ubuntu/Debian)

Networking & Protocols: TCP/IP, DNS/DHCP, VPN Setup (Tailscale, OpenVPN), LAN/WAN Diagnostics, Subnetting

IT Automation & Scripting: PowerShell, Bash, Python, CLI Automation, Task Scheduler / cron

ITSM & Operations Tooling: Jira Service Management, Bug Lifecycle Tracking, Postman, Docker, Git/GitHub, DBeaver

Education

Bachelor of Science in Computer Engineering | *Rizal Technological University* Graduated – July 2026

- Cumulative General Weighted Average (CGWA): 1.73 | Dean's List Academic Honor Awardee
- Specialization in IT Infrastructure, Embedded IoT Systems, and Data Architecture
