Experience

- IT Quality Assurance Intern** | *Staff Domain – Internship* **January 2026 – June 2026**
- Executed functional QA testing, regression verification, and full bug lifecycle tracking for internal ITMS modules in Jira, directly contributing to enterprise system stability.
 - Formulated end-to-end test cases and performed data validation routines across 20,000+ migrated asset records, ensuring zero data loss or schema discrepancies during database cutover.
 - Developed automated verification scripts in PowerShell to validate system configurations, endpoint security policies, and application dependencies.
 - Documented detailed defect reports, root cause analyses, and test execution summaries to facilitate cross-functional resolution between IT and software support teams.

Projects

- Four-in-One Vital Sign Kiosk** | *PyTest, Postman, Python, Flask* **June 2025 – May 2026**
(ISO/IEC 25010 Quality Framework)
- Spearheaded comprehensive quality validation adhering to ISO/IEC 25010 product quality standards, assessing functional suitability, performance efficiency, and fault tolerance.
 - Designed and executed automated unit and integration test suites using PyTest, verifying RESTful API request/response integrity and sensor serial streaming error-handling.
 - Performed non-functional stress and latency testing, confirming sub-second telemetry throughput across continuous multi-sensor hardware loops.
- Web-Based Ticketing & Queue Analytics System** | *Postman, SQL, Python, Flask, PyTest* **June 2026**
- Conducted extensive API endpoint testing using Postman, verifying HTTP status codes, authorization headers, and edge-case payload validation.
 - Validated Role-Based Access Control (RBAC) security permissions across user tiers, catching privilege escalation vulnerabilities prior to deployment.
 - Executed database assertion checks in SQL to ensure queue priority logic and ticket status state machines maintained complete transactional integrity.
- Social Media Analytics Automated Pipeline** | *Docker, PostgreSQL, Python, PyTest* **August 2026**
- Built automated data validation routines and schema assertions in Python, testing against malformed JSON payloads and null values.
 - Verified transactional ACID compliance and rollback mechanisms across 10,000+ batch records during simulated container failure scenarios.
- AI Kilo Bot Hardware-Software Quality Calibration** | *Sensor Fusion, Raspberry Pi, Python* **December 2025**
- Executed precision calibration and tolerance testing on dual HX711 ADC modules, verifying measurement repeatability down to a 2g threshold.
 - Benchmarked edge computer vision inference latencies, ensuring stable 65ms processing times under continuous operation.

Certifications

- Python Essentials 1** | *Cisco Networking Academy & OpenEDG* **July 2026**
- Validated technical proficiency in testable code architecture, exception handling, data structures, and algorithmic logic.
- Associate Data Analyst** | *DataCamp* **August 2026**
- Validated advanced data querying, boundary analysis, data transformations, and data verification using PostgreSQL.
- Data Fundamentals** | *IBM SkillsBuild & TESDA* **July 2026**
- Enterprise credential validating relational databases, schema structures, and systematic data cleansing procedures.

Technical Skills

QA Testing Methodologies: Functional Testing, Regression Testing, Integration Testing, System Testing, Test Case Design, Defect Lifecycle Tracking, API Testing, ISO/IEC 25010 Standards

Testing Tools & Frameworks: PyTest, Postman, Jira (Defect Tracking), DBeaver (Database Verification)

Scripting & Automation: Python, PowerShell, SQL, Bash, JavaScript

Environments & Platforms: Linux, Docker, Git/GitHub, REST APIs, PostgreSQL, MySQL

Education

- Bachelor of Science in Computer Engineering** | *Rizal Technological University* **Graduated – July 2026**
- Cumulative General Weighted Average (CGWA): 1.73 | Dean's List Academic Honor Awardee
 - Specialization in Software Quality Verification, Embedded Systems, and Data Architecture
